Projects

Project Name: Data Analyst expert – Upwork.com
- **Client name:** Pawan Pinjari
- **Project Description:** Client provided data in excel sheet. I have performed Data Cleaning via formatting data. Remove duplicate. Append & Marge queries. Replaced wrong values with appropriate ones. Uploaded data into **MYSQL** to check data by using **SQL query**. Uploaded data in **Power Bi** to created models and visualization.

Project Name: Tableau dashboard – Upwork.com
- **Client Name:** Kiar Laos
- **Project Description:** Kiar was a university student and facing problem for her project in **Tableau**. She provided data using **Microsoft Excel.** I had to apply some Data Analytics techniques such as Formatting data, creating necessary columns, apply filter formulas and pivot table for creating the infographics.

Project name: Excel modification for patient data = Upwork.com
- **Client Name:** Naheed Ali
- **Project Description:** Naheed has been working in the health care sector of USA since last 11 years. She needed some modification in her excel data sheet. I have performed **Lookup Functions** to grab related data into one excel sheet from multiple sheets. I have also created some filters to hide unwanted data for the assignment and created some conditional columns.

Project name: Report for Tech Shark LLC = Fiverr.com
- **Client Name:** Arslan
- **Project Description:** Arslan managed Call log data from VoIP Calling App. He needed a Power bi Infographic to present it to his client. I have performed **Data cleaning using power query and DAX**. I have also created some filters to hide unwanted data for the assignment and created some conditional columns which helped to create the infographic as per the client's requirement.
